Texture Notes:

Not all colors work with all surfaces.

Rockface, Mega, Haze and Stonewall are Rotocolor colors.

As the design is created with a roll it is obvious that they can only be printed on smooth surfaces and can't be used on groove positive, stripy pattern, NewWave, SineWave, Shed, Canyon and probably Kaijo profiles.

Milan, Quarzit and Savona are Digital Print colors. In principle it can be print on all surfaces. But the design can change or become deformed. In some cases, small stripes can be visible on darker colors.

Schematic diagram: production-related deviations possible in individual cases; exact panel cross-section on request.

- In addition to the variants shown, other, individual developments are possible on request.
- Due to the different panel cross-sections, the choice of the fastening system depends on the individual case.
- Furthermore, color deviations compared to the standard variants cannot be excluded.
